KEY SELLING POINTS

Hunterson, the improved Magic Wallet

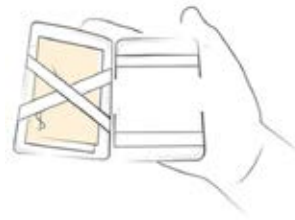

Magic Wallets are unique in a way that they put the money away for you. Hunterson optimized the original magic wallet strap system. The straps are wider to avoid stretching and finished in matching colors. Delivering you a lifetime of magic in style.

1. Put the money on the straps

2. Close the wallet

3. Open the wallet on the other side

RFID Protection

Most credit and debit cards have embedded RFID technology. RFID chips are a way to store and read data. You can simply wave your card in front of a scanner.

Hunterson RFID Magic Wallets are equipped with an integrated RFID shield to avoid loss of information against your will.

Fits all currencies

Our wallets are optimized for all international notes.

Genuine Leather

Handmade leather magic wallets, made by skilled craftsmen. Attention to detail combined with cow leather from the highest grade and a soft-touch glossy finish. Every single Magic Wallet is manually checked so it meets our high quality standards.

Gift Packaging

All our wallets come in a nice branded gift box! Easy to wrap it or just tie a bow around it. The packaging is simple and no fuss, just like Hunterson!

POS DISPLAY STANDS

The Hunterson Magic Wallet system is clever and unique. We've designed a range of displays to showcase our products and its special features. Our displays have an integrated screen that shows a demonstration video or engraved instructions. All displays are handmade in Belgium and can be tailored to your specific needs.

THE VEGAN COLLECTION

PIÑATEX

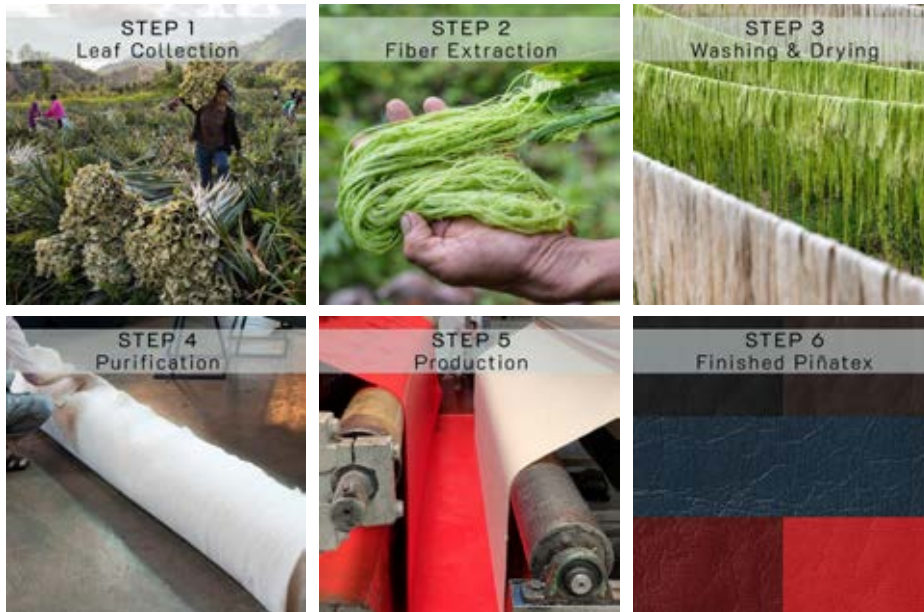

Piña-What?

Yes Piñatex, a textile made from pineapple leaves, which is normally considered waste. Talk about a win-win situation!

Piñatex is non-woven textile, which is 100% vegan and PETA approved. Since waste is used to produce this textile, it has low environmental impact it is ethically sourced.

The Life Cycle

What makes Piñatex PETA-Approved?

- No additional environmental resources required for raw material.
- No chemicals on the Cradle2cradle list of banned substances used in production.
- Closed loop production – residual leaf biomass is used as natural fertilizer/biofuel.
- Non-woven mesh is biodegradable.

Hunterson quality

Before using the Piñatex material, it was important for us that we could guarantee the same Hunterson quality as always.

We checked the strength, durability and water resistant. After this we only needed to add our own magic. And Eureka, we got a strong durable and Hunterson worthy product!

THE VEGAN COLLECTION

For our vegan collection, we use patented Piñatex material. The same magic wallet, but eco-friendly, PETA approved and biodegradable.
